

# FOREX NUKE v2.0

# INSTRUCTIONS

Thanks for your purchase of the ForexNuke EA!

This EA Works best on the EUR/USD pair – M15

(Euro/US Dollar -15 Minute Timeframe)

*We have also had reports of trading on GBP/USD and AUD/USD.*

*Please trade on those pairs at your **own** risk.*

**Please Follow The Following Instructions Carefully!**

**[www.ForexNuke.com](http://www.ForexNuke.com)**

**If you did not purchase this, and you believe you got a fraudulent copy..**

**Email [support@ForexNuke.com](mailto:support@ForexNuke.com) for a CASH \$\$ reward.**

## **CHANGELOG from v1.0 - (17<sup>th</sup> Nov) to v1.5 (27<sup>th</sup> Jan).**

- **ECN Compatibility has been added!**
- **Possibility to set maximum number of trades**
- **A better Money Management system**
- **5 digit accounts automatically recognised**
- **General tweaks and optimisations**

## **HOW TO SET UP YOUR FOREX NUKE SYSTEM**

### **[See The Setup Video](#)**

So you must have unzipped the folder to be reading these instructions, the other files you will have in the folder are the:

1. ForexNuke v2.0.ex4
2. FX\_NUKE.dll

**DO NOT TRY AND OPEN EITHER OF THESE FILES AS YOU WILL GET AN ERROR MESSAGE FOLLOW THE STEP BY STEP INSTRUCTIONS BELOW AND IF YOUR ARE STUCK TAKE A LOOK AT OUR PROBLEM SOLVING SECTION.**

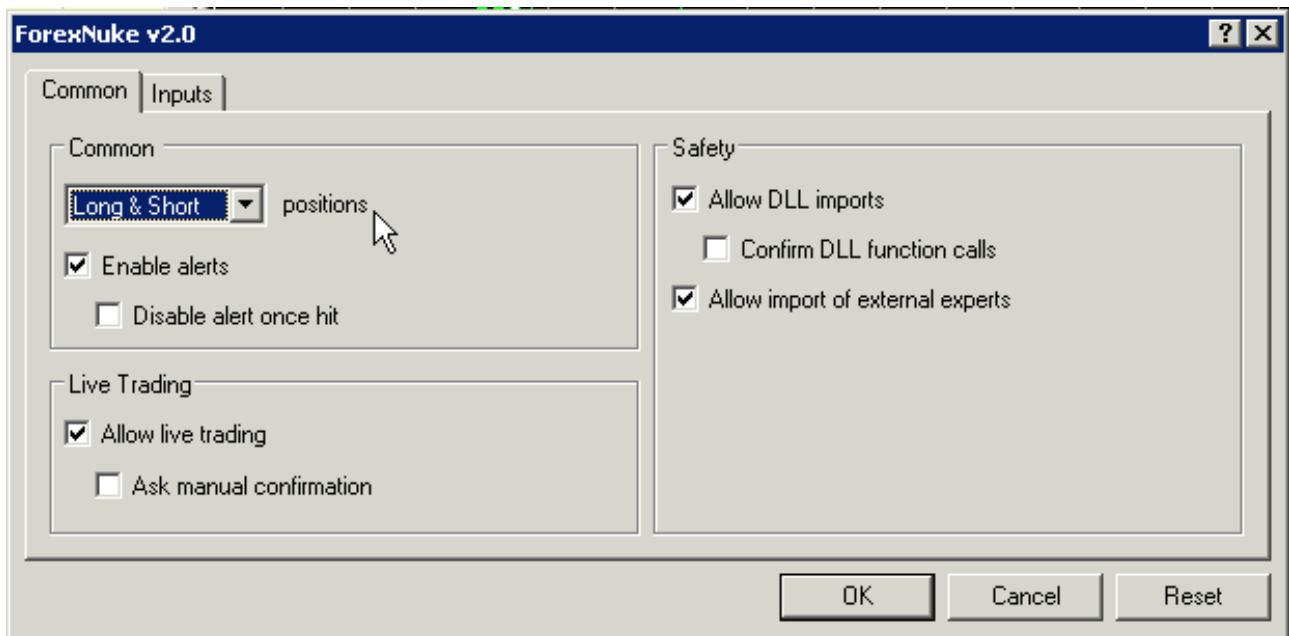

To set up the Forex Nuke simply follow the steps below.

1. Go to start on your computer (bottom left on most computers)
  2. Click on 'my computer'
  3. Double click 'local disk (C:)'
4. Double click 'program files'
5. Now navigate to your MetaTrader brokers platform and double click the MetaTrader file icon.
6. Now double click the experts folder.
7. You will now have the experts folder, you need to get the ForexNuke v1.5.ex4 file that you downloaded, and drag and drop it into this folder.
8. Now double click the libraries folder
9. Once you have opened the libraries folder, drag and drop the FX\_NUKE.dll file in there.

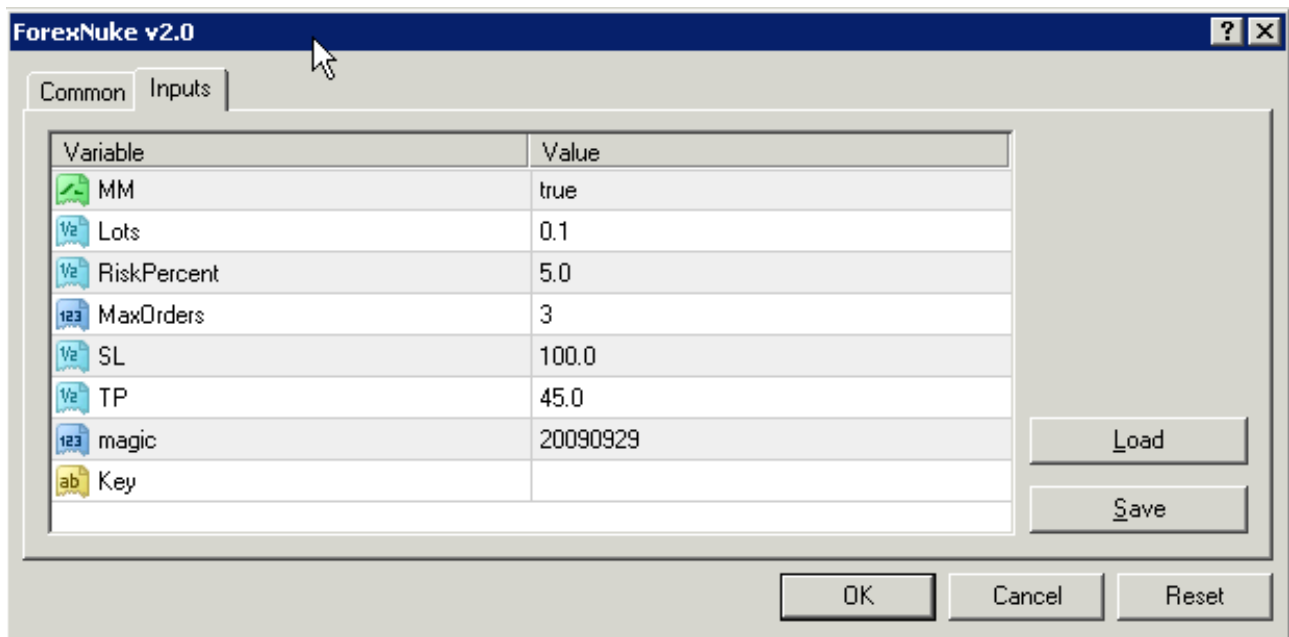

The following page shows you how to setup the system in Metatrader.

## SETTING UP THE SYSTEM IN METATRADER

1. Open your metatrader trading platform
  2. Navigate to the expert advisor's tab and you will see the Forex Nuke system showing in grey. (If you don't see it – Restart MetaTrader) You need to open a EUR/USD chart.
  3. To do this go to file – new chart and open EUR/USD
3. Now right click on the EUR/USD chart and click periodicity and change to 'M15'
4. Now navigate to the experts tab, find the Forex Nuke grey icon and drag it onto the EUR/USD chart.
  5. You may then see this window – If not..  
Now right click on the chart and navigate to expert properties, tick the settings as in the box below.

6. You then need to switch to the Inputs tab, and enter your serial key.  
(This was emailed to you – if not contact [support@forexnuke.com](mailto:support@forexnuke.com))

**If you have advance trading knowledge:**

**You may change the settings here, otherwise please **leave them how they are!!****

#### Brief Descriptions

**MM – Money Management.** Enable/Disable Automatic lotsize calculation. If set to false the EA will trade on the defined lotsize. Is set to true, it calculates the size of a trade automatically based on the RiskPercent setting.

**Lots – Lot Size.** This is the size of the lots traded. Define here, or allow MM to control.

**RiskPercent.** Which % of your equity is at risk per open trade.

**MaxOrders.** This is the maximum amount of concurrent trades (open at the same time).

**SL – Stop Loss.** The EA will stop if the loss goes below (in this example) 100 pips.

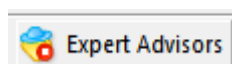

**TP – Take Profit.** The EA will take the profit (in this example) in 45 pips.

**Magic.** If you run the SAME EA, on the SAME account twice, the magic no. must be unique.

**Key.** This should have been emailed to you. If not contact [support@forexnuke.com](mailto:support@forexnuke.com)

-----

7. You should now have a smiling face in the top right hand corner of the chart, if so the system is setup, if you have an x in the top right then click on the 'expert advisors' tab on the top toolbar and it should turn into a smiling face.

## PROBLEM SOLVING

**Problem:** I haven't got a smiling face in the top right corner?

**Solution:** Make sure you have clicked allow live trading in the expert properties, to do this right click on the chart, click expert advisors then properties then under the common tab tick 'allow live trading'.

**Problem:** I have an x in the top right corner instead of a smiling face?

**Solution:** Click on the 'expert advisors' tab on the top toolbar. (As shown on previous page)

**Problem:** My Forex Nuke system is not trading?

**Solution:** This EA is built to make PROFITABLE trades, and may spend a few days looking for an appropriate entry time – Please do have some patience with this EA!

If you are trading 0.01 lots please make sure your broker supports them.

Make sure you have placed the FX\_NUKE.dll file in the libraries folder i.e:

C:/programfiles/metatrader/experts/libraries .

Also, double check you entered your serial key (Instructions on previous page)

**Problem:** I cannot find the Forex Nuke EA under the experts tab in metatrader?

**Solution:** You must have placed the file in the wrong folder, make sure it is in c:/programfiles/metatrader/experts then **restart your metatrader platform.**

Any enquires please don't hesitate to contact us at [support@ForexNuke.com](mailto:support@ForexNuke.com)
